Dräger. Technology for Life®

D-5650-2019

Easier workflows, every day, every step of the patient pathway

Dear Customer,

Quality medical equipment, innovative digital solutions, cost-effective management, these are cornerstones that make it easier for you to provide dedicated healthcare to your patients. Now, imagine improving the quality of healthcare you deliver by simplifying your hospital's chain of acquiring the technology and services needed. Whether it's help in: planning ergonomic workstations, managing costs of care, or in improving staff satisfaction, we make it possible for you to enable high quality therapy – all from a single source. The same detailed attention that we design into our ventilators, anaesthesia workstations, incubators and monitoring products, goes into the engineering and manufacturing of our accessories and consumables, as they are an integral part of life-saving medical equipment. Improved clinical, operational and economic outcomes through the entire patient pathway is our common goal.

Freeing you of routine tasks by streamlining and facilitating your hospital processes and workflows, reducing staff stress and unnecessary costs by offering you tailor-made solutions, at the end of the day it means giving you more time to care for your patients' wellbeing and recovery. We provide you with the necessary tools to give high quality care through complete therapeutic solutions. For us, ensuring a commitment to outstanding quality means rigorously testing our products so that they fulfill all standard requirements. Together with you, we work to design intelligent, holistic workspaces that satisfy staff, manage costs, and promote patient safety and healing. Medical technology and solutions are what we do – every day, everywhere – this is what we expect of ourselves, this is why we are **Your Specialist in Acute Care**.

Helping to shape a more sustainable future

For over 130 years, we have committed ourselves to providing excellence in the quality of our products. But we don't believe in stopping here. We also take responsibility in creating sustainable products to lessen our impact on the environment.

We have agreed with nearly all of our suppliers to a code of conduct which defines specific requirements regarding workers and environmental protection. Furthermore, we have established an Air-to-Sea programme which continuously switches transport volume from air to sea freight, thus reducing CO_2 emissions. To combine patient safety and sustainability, the majority of our accessories are free of natural latex and do not contain PVC or phthalates (DEHP amongst others).
As described in our Sustainability Report, we have embraced numerous measures to create the best possible conditions for working in an environmentally friendly manner. In recognition of our continuous efforts, we have, once again, been awarded with the EcoVadis Gold Medal for 2022.

For us, sustainability reaches beyond our company grounds. It means creating the best possible conditions for our customers, business partners, employees – and our planet as a whole.

As Your Specialist in Acute Care, this is our commitment.

On this way you'll find your accessories:

VENTILATION ACCESSORIES 06

1. Breathing circuits
2. Breathing system filters and HMEs
3. CO_2 cuvettes
4. Catheter mounts and airway connectors
5. Non-invasive patient interfaces and accessories
6. Oxymixer
7. Device related accessories
8. Pack2Go®/Set2go
9. Humidifier and nebulizer
10. Spare parts for Resuscitators

SODA LIME 96

SENSORS 102

MONITORING ACCESSORIES 108

1. Infinity® Monitoring: Gamma, Delta, Kappa and Vista series
2. Infinity® Acute Care System
3. Infinity® M300
4. Vista 120
5. Vista 120 SPOTCHECK
6. Multi Vendor Adapter

WARD EQUIPMENT 258

1. Oxygen therapy
2. Medical aspiration
3. Accessory for gas supply

RAIL ACCESSORIES AND EXAMINATION LIGHT 336

1. Rail accessories
2. Examination light
3. Hinged arms

Ventilation Accessories

Making breathing easier

Comfortable, stable oxygen delivery is of the highest importance when administering ventilation. You need reliable lung-protective strategies that are ready for use at a moment's notice, including easily integrated ventilation accessories that work seamlessly in the background – so you can stay focused on your patients' well-being.

Our wide range of accessories enhance patient comfort whether it is for non-invasive therapies, humidification solutions, or heated breathing circuits. Patient comfort and ease of use were the focal point when designing our ventilation accessories. Moreover, our disposable accessory range of breathing circuits and filters for active protection help to prevent cross contamination and greatly improve infection prevention programmes in your clinical environment.

As a healthcare professional, we understand you value quality when delivering ventilation therapy. This is why we test our products extensively for both quality and compatibility with our devices.

We are Your Specialist in Acute Care every step of the treatment pathway: from the emergency department or surgical area to the intensive care and neonate units.

1. BREATHING CIRCUITS

1.1 DISPOSABLE BREATHING CIRCUITS/SETS AND RELATED ACCESSORIES

With VentStar® Family Dräger offers a wide range of disposable breathing circuits for different applications as well as for different patient groups (neo, ped, adult). Customers can choose between various kinds of materials. All disposable breathing circuits are made of high quality material and all gas leading components are PVC-free (no harm through softeners like e.g. DEHP). Special focus at Dräger is the interaction between Dräger device and related breathing circuit what is documented in our declarations of system compatibility.
Declarations of system compatibility underlie intensive testing in various scenarios which are based on our long-time experience concerning interaction of device with accessory. With respect to the newest device generation we enlarged our portfolio with ID breathing circuits which support the Infinity® ID functionality of the relevant Dräger devices.

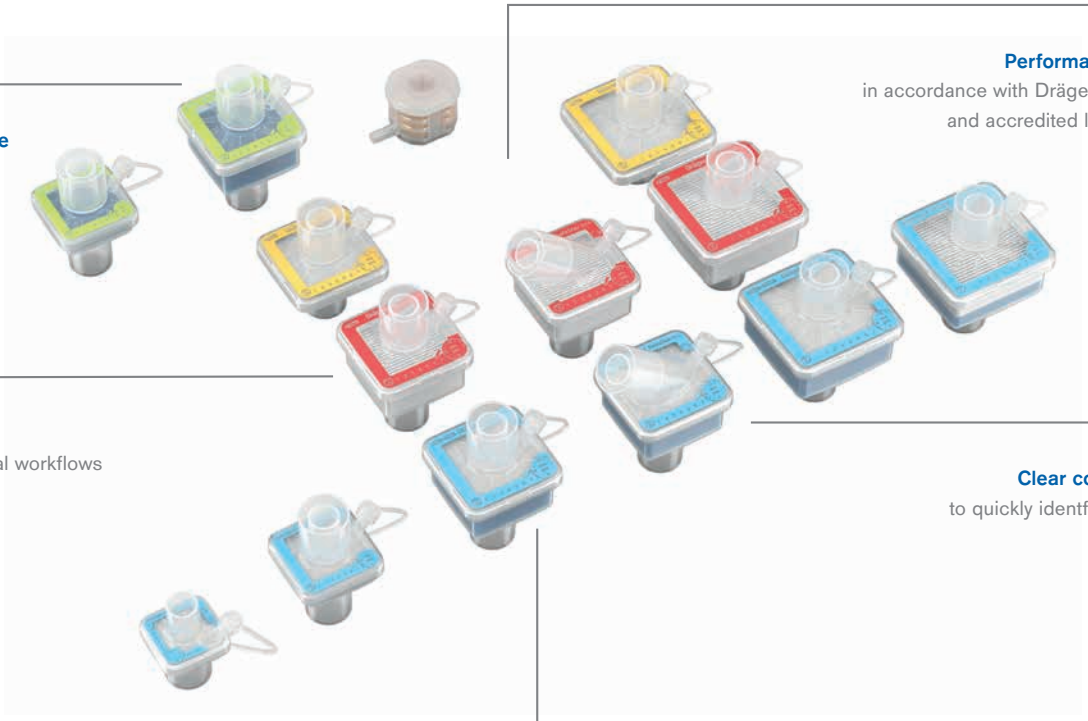
Filter/HME

avoiding nosocomial infections

and support of lung protective ventilation

Our new filter portfolio



High performance filtration rates
to reduce risk of nosocomial infections

Performance tested
in accordance with Dräger standards and accredited laboratories

Writable surface
to facilitate clinical workflows

Clear color coding
to quickly identfy right filter

Excellent moistening performance
to support lung protective ventilation

To be able to rely on the quality of medical equipment is a needed prerequesite to fully concentrate on the application of therapies to take care of patient recovery and wellbeing. We provide you with high quality filters for a wide range of applications and patient groups.

BREATHING SYSTEM FILTERS AND HMEs

2. BREATHING SYSTEM FILTERS AND HMES

ELECTROSTATIC FILTER AND HME

The TwinStar® Plus filter/HME from Dräger is a combination of an efficient HME and a high-performance breathing system filter, thereby significantly contributing to infection prophylaxis in ventilation treatment.

- Combination of efficient HME and high-performance breathing system filter
- High retention rates for bacteria and viruses
- High return of moisture
- Minimal workload and low cost
- Sampling connector with tethered cap
- Transparent housing for visual control
- Standardized connectors for safe connection to other components
- Clear labeling and blue color coding for quick identification

BREATHING SYSTEM FILTERS

ELECTROSTATIC FILTER

The CareStar® Plus breathing system filter significantly contributes to infection prophylaxis in anesthesia and ventilation treatment through high retention rates.

- High-performance electrostatic filter
- Patient-side or device-side use
- Minimal workload and low cost
- Sampling connector with tethered cap
- Transparent housing for visual control
- Standardized connectors for safe connection to other components
- Clear labeling and yellow color coding for quick identification

BREATHING SYSTEM FILTERS

MECHANICAL FILTER

The SafeStar® Plus mechanical high performance breathing system filter shows excellent retention rates, thereby significantly contributing to infection prophylaxis in anesthesia and ventilation treatment.

- High-performance mechanical HEPA filter
- High hydrophoticity
- Patient-side or device-side use
- Sampling connector with tethered cap
- Transparent housing for visual control
- Standardized connectors for safe connection to other components
- Clear labeling and red color coding for quick identification

CATHETER MOUNTS AND AIRWAY CONNECTORS

4. CATHETER MOUNTS AND AIRWAY CONNECTORS

- Smoothbore products provide low resistance to flow while external coil reduces kinks and blockages
- Extendable product provides a lightweight and flexible solution
- Double swivel connector increases ease of use
- Double cap to maintain PEEP during suctioning or bronchoscopy
- Each catheter mount and airway connector is equipped with a red safety cap so that the system is completely closed and protected until directly prior to use on the patient
- 22F/15M connector on device side as a two-in-one solution
- Standardized connectors for safe connection to other components
- Luer Lock port for gas sampling
- Disposable convenience enhances workflow
- PVC-free design of gas leading components eliminates risk of softeners such as DEHP

NIV MASKS AND ACCESSORIES

5. NON-INVASIVE PATIENT INTERFACES AND ACCESSORIES

5.1 NIV MASKS AND ACCESSORIES

ClassicStar® NIV oronasal masks cover the nose and mouth of the patient. Therefore, they provide effective therapy even in case of mouth breathing.
The mask design ensures high patient comfort combined with anatomical fit and effective seal due to individually adjustable mask cushion. The 6-point headgear provides a stable and secure fixation. Adjustable forehead support and forehead pad allow for distributing the pressure from the bridge of nose towards the forehead for more patient comfort.
ClassicStar® NIV masks with standard elbow (SE) have been successfully tested for compatibility with Dräger ventilators which have NIV-option. Variants with Anit-Asphyxia Valve (AAV) are intended for Multi-Vendor-Accessory business.
All ClassicStar® NIV masks are for single patient use.
Sizing gauges for easy mask size identification as well as a pumpball are delivered togehter with the masks.

NIV MASKS AND ACCESSORIES

Oronasal masks are often the first-line strategy in the initial management of acute respiratory failure as they cover nose and mouth. Nasal masks are often chosen if NIV therapy has to be prolonged due to improved comfort and reduced complications associated with oronasal masks. Similar to ClassicStar® oronasal masks, the nasal mask cushion can be individually adjusted to the patient's face providing high patient comfort and effective seal. The 4-point-headgear ensures a stable and secure fixation reducing mask displacement.
All ClassicStar® NIV nasal masks are for single patient use.
Sizing gauges for easy mask size identification as well as a pumpball are delivered togehter with the masks.

NIV MASKS AND ACCESSORIES

The ClassicStar® NIV total-face mask seals around the perimeter of the face, covering mouth, nose and eyes. These areas are less pressure sensitive and have smoother facial contours compared to the areas a oronasal masks covers (nasal bridge). The mask is suitable for patients with nasal bridge breakdown or facial irregularities. The air filled cushion can be adjusted individually to the patients face, providing high patient comfort and effective seal.
The 5-point headgear which includes a headstrap at the top of the mask provides a stable and secure attachment, thus preventing mask displacement and reducing pressure. Quick release clips are integrated for quick removal of the mask.
Sizing gauges for easy mask size identification as well as a pumpball are delivered together with the masks.

NIV MASKS AND ACCESSORIES

The ClassicStar® plus mask series features a soft and anatomically shaped silicone cushion as sealing interface to the patients face. The mask has an easy to adjust forehead pad with silicone cushion which allows optimal adaption to the sensitive nasal bridge. The mask is available in four sizes (S, M, L, XL) as oronasal and nasal mask. ClassicStar® plus NIV masks with standard elbow (SE) have been successfully tested for compatibility with Dräger ventilators which have NIV-option. Variants with Anti-Asphyxia-Valve (AAV) are intended for Multi-Vendor-Accessory business.

ANESTHESIA MASKS AND ACCESSORIES

5.2 ANESTHESIA MASKS AND ACCESSORIES

ANESTHESIA MASKS SEDISTAR®

The disposable anesthesia face mask SediStar® features a soft and anatomically shaped lip as the sealing interface to the patient's face. The mask is BPA and PVC free.

Optimal fit

Due to the ergonomic design and sealing lip the mask offers an optimized fit for different facial anatomies.

Color-coding

Every mask size is color coded by a different label, which makes it easy to identify the correct mask size right of the shelf.

Additional mask accessories

Easy application is supported through additional mask accessories: hook ring and headgears for fixation. Two different headgears in small and large designs offer patients and physicians a soft and elastic support and holding position.

ANESTHESIA MASKS AND ACCESSORIES

ANESTHESIA MASKS COMFORTSTAR®

Patient comfort and ease of use were the top priorities when developing the Dräger disposable ComfortStar® anesthesia mask portfolio. Patient comfort is supported by teardrop or round-shaped masks and adjustable (inflatable) mask cushion which provide anatomical fit with effective seal. Built-in ridges (sizes 4 – 6) and a flexible mask body provide healthcare professionals an easy and comfortable grip. ComfortStar® scented anesthesia masks have the same excellent benefits of the ComfortStar® standard masks, but in addition, they have added aromas. The appropriate color scheme provides optical stimulation and is intended to reduce pre-operative anxiety in patients.
All masks are pre-equipped with ‚Traffic Light' colored hook rings. They are color coded for easier size identification. Smaller sizes (0 – 1) have reddish color, mid-sizes (2 – 3) yellowish color and large sizes (4 – 6) greenish color. All ComfortStar® masks are compatible with all Dräger anesthesia devices.
Pumpball as well as different headgears for fixation are available (cf. accessories for anesthesia masks).

ANESTHESIA MASKS AND ACCESSORIES

SILICONE MASKS

Silicone masks are made of medical grade silicone because this is generally considered the material of choice for its superior ability to conform to the patient's facial anatomy. The field of application includes anesthesia and mask ventilation for pediatric and adult patients. The masks are available in various shapes and sizes.
The smaller sizes have a rather round shape in order to provide comfortable fit and effective seal for the faces of infants.
The bigger sizes have an anatomically formed teardrop shape to ensure convenient fit and seal for facial contours of adult patients.
Silicone masks have a flexible, soft and transparent mask body.
The mask body design provides a comfortable grip. Shape and material allow for safe handling by doctors and nurses.
The silicone masks are reusable.

OXYGEN (O_2) AND AEROSOL THERAPY MASKS, VENTURI MASK KITS, NASAL CANNULAS AND ACCESSORIES

5.3 OXYGEN (O_2) AND AEROSOL THERAPY MASKS, VENTURI MASK KITS, NASAL CANNULAS AND ACCESSORIES

Oxygen therapy is the administration of oxygen at a concentration higher than in ambient air. The purpose is to prevent and/or treat the symptoms and manifestation of hypoxia. Aeorsol therapy is used to administer medicine in the patient airways/lungs in order to reduce inflammation caused by different respiratoy conditions. The aerosol and oxygen therapy masks are for disposable use.

HIGH-FLOW THERAPY NASAL CANNULA AND ACCESSORIES

5.4 HIGH-FLOW THERAPY NASAL CANNULA AND ACCESSORIES

High Flow Therapy allows to provide warm humidified air with enriched oxygen concentration at flow rates up to 60 l per minute to patients via nasal cannulas. Patient comfort is one of the advantages of High Flow therapy over other treatment forms for patient with compromised respiration and can in many cases successfully avoid using less comfortable or even invasive forms of respiratory support. The HI-Flow Star Nasal Cannula and the inspiratory breathing circuit offer advanced features designed for enhanced patient safety and comfort such as integrated clips in order to provide effective breathing circuit tension relief, a flexible, breathable hose minimizing internal condensation in the high flow nasal cannula as well as soft materials for the prongs and the headgear.
Thanks to its symmetrical design, the nasal cannula can be connected from either the left or the right side of the bed. This helps caregivers save time and effort. The HI-Flow Star products are disposable. Oxygen and compressed air are required which are provided by an O_2 mixer such as the Oxymixer from Dräger, as well as a humidification source for the hose system.

A	❶	**HI-Flow Star Nasal Cannula, disposable, adult S, Flow Range < 60 l/min, 25 pcs.**	**MP05511**

OXYMIXER*

6. OXYMIXER

Oxymixer enables a continuous and individually adjusted mixture of medical air and medical oxygen to be administered to infants, children and adults. The O_2 concentration is easily adjusted to a highly accurate flow – even with flow rates of less than 3 l/min.

Oxymixer configuration — **MP04200**

Free choice of Low- or High Flow Blender with:
1 or 2 flowmeter, NIST or DISS gas inlet,
Monitor, Bleed swith, Nozzle, Sound damper.
The rail fixation is included.

A **Oxymixer High Flow** — **MP04201**

Including: Rail clamp, Flowmeter 0 – 32 l/min right,
Flowmeter 0 – 85 l/min left.

B **Oxymixer High Flow with monitor** — **MP04202**

Including: Rail clamp, Flowmeter 0 – 32 l/min right,
Flowmeter 0 – 85 l/min left, Monitor, Oxygen sensor,
Oxygen sensor cable, Sensor receptacle.

C **Multi-P trolley* equipped** — **MP13020**

Including base with 5 castors, 38 mm Ø pole, 3 rail clamps, basket.

D **Multi-P trolley*** — **MP13021**

Including base with 5 castors and 38 mm Ø pole for accessories.

Several hoses to connect Oxymixer with the central supply.
For CS hoses see chapter 4, “Accessory for gas supply”.

Soda lime

Contactless and dustless–protect your patient, protect yourself

Protecting your patients, protecting your staff – we take safety seriously. In the operating room every breath the patient takes is paramount to their safety. Safeguarding both patient and clinician during this critical time is of the highest importance. With our Drägersorb CLIC disposable absorber, you can protect your patients from breathing exhaled carbon dioxide thanks to the soda lime absorption, which filters and absorbs the patient's exhaled carbon dioxide. In addition, in just one click, you can easily and quickly change absorbers during a surgical procedure, giving you more time to care for your patient.

Improve infection prevention and maximise economic efficiency: Drägersorb CLIC is a disposal solution in which staff have no direct contact with dust and saves on costs due to its colour indicator that tells you exactly when it is used up.

Sensors

Improved diagnostics means improved therapy solutions

Patient data is valuable for both diagnosing and delivering the correct therapies for your patient's pathway to recovery. This is why the reliability and quality of collected data is imperative when diagnosing and monitoring. It must provide you with accurate volume, flow, and pressure values so as to assess your patient's lung condition and reduce ventilator-associated pneumonia (VAP).

Our sensors are rigorously tested for both quality and compatibility with our devices because we know this allows you to reliably monitor every patient's vitals so as to improve your patient outcomes.

SENSORS

FLOW SENSORS BY DRÄGER

Hot-wire anemometry:
Accurate and intelligent flow measurement
Spirolog®, neonatal flow sensors and SpiroLife® are based on proven hot-wire anemometry techniques. Due to extremely fast and accurate measurement results, as well as extremely low inspiratory and expiratory resistances, it is clearly superior to other methods. You only need one flow sensor for all patients.
Neonatal flow sensors offer customized solutions for the sole exception of the specific needs of neonates in intensive care. The sterilizable neonatal flow sensors and SpiroLife® combine the advantages of hot-wire technology with the possibility of sterilizability. Therefore, they integrate seamlessly into your hospital's sterilization processes.

A	**Flow sensor Spirolog®, PC/ABS, 5 pcs.**	**8403735**
B	**Flow sensor SpiroLife®, PPSU, sterilizable**	**MK01900**
C	**Flow sensor Infinity® ID, PC/ABS, 5 pcs.**	**6871980**
D	**Neonatal flow sensor ISO 15, PSU, sterilizable**	**8411130**
E	**Insert for neonatal flow sensor, PSU, sterilizable, 5 pcs.**	**8410179**

Differential pressure measurement:
proven technology for emergencies
The sterilizable reusable flow sensor for the emergency room is based on the proven principle of differential pressure measurement. Because of its robustness, it really is the ideal solution for the specialties of the emergency room. The pressure differential sensor is used on Oxylog® 3000 plus, Oxylog® 3000 and Oxylog® 2000 plus. Whichever Dräger flow sensor you choose – you can be sure to have made the right choice with our extensive family of flow sensors.

SENSORS

OXYGEN SENSORS BY DRÄGER

Oxygen for Life
Oxygen sensors have the important task of measuring and monitoring the inspiratory and/or expiratory O_2 concentration in anesthesia and respiratory devices. Oxygen sensors from Dräger satisfy the highest national and international requirements. Furthermore, they have been extensively tested and fine-tuned for proper functional performance with Dräger devices and systems.
Dräger's years of experience in the field of sensors, and their high quality has even convinced NASA. Dräger O_2 sensors are electrochemical transducers used to measure O_2 partial pressure.
They operate on the principle of a galvanic cell.
Examples of locations where the sensors are used include the Fabius® family, Evita® family and the Primus®.
To take into account the high value of oxygen measurement, we only recommend using O_2 sensors from Dräger.

Monitoring accessories

Patient-centred care: Integrated solutions that fit

To support the delivery of quality care, you need quick access to patient data with all relevant information at a glance to reliably assess your patient's status. So as to enable you to get the relevant information and to accurately take care of the patient's needs, we provide you with a broad portfolio of monitoring accessories – all from a single source.

Equally important, to help you break the chain of infections while offering you accuracy and reliability, we provide you with hygienic, single-patient use solutions such as our:

- Electrocardiography leads
- Non-invasive blood pressure (NIBP) cuffs
- Temperature probes, e.g. Tcore sensor

Assisting you in delivering a patient-centred approach, as Your Specialist in Acute Care, we have paid detailed attention in designing our accessories using quality materials that promote comfort and patient satisfaction.

TCORE® TEMPERATURE MONITORING SYSTEM

1.5 TCORE® TEMPERATURE MONITORING SYSTEM

Tcore® – a new non-invasive technology for accurate core temperature monitoring Tcore® employs a unique dual-sensor heat flux technology, which, following a short ramp-up time, calculates core body temperature continuously and accurately. A simple, self-adhesive sensor – for children from 5 years of age and adults – placed on the patient's forehead is all that's required. This single-use sensor can be connected through a battery-powered adapter to all current Dräger monitors*, eliminating the need for a dedicated display.
*Exception: Vista 120 product family, patient monitors.

INFINITY® ACUTE CARE SYSTEM

2.4 TCORE® TEMPERATURE MONITORING SYSTEM

Tcore® – a new non-invasive technology for accurate core temperature monitoring Tcore® employs a unique dual-sensor heat flux technology, which, following a short ramp-up time, calculates core body temperature continuously and accurately. A simple, self-adhesive sensor – for children from 5 years of age and adults – placed on the patient's forehead is all that's required. This single-use sensor can be connected through a battery-powered adapter to all current Dräger monitors*, eliminating the need for a dedicated display.
*Exception: Vista 120 product family, patient monitors.

A	**Tcore® adapter, reusable**	**MP00999**

Ward equipment

Adapting to the needs of your patients

Removing complexities and optimising your hospital's clinical workflows are key elements to ensure both patient and healthcare staff safety. Intelligent, user-friendly ward equipment does just that – promotes ergonomic workstations which reduce stress related to heavy lifting or uncomfortable access between equipment and the patient, thus improving staff satisfaction.

Our tailor-made workstations integrate optimised solutions so as to create a hygienic, healing environment that can help you deliver life-saving therapies to your patients.

FLOWMETER

1. OXYGEN THERAPY

1.1 FLOWMETER

These O_2 Flowmeters are plugged directly into a wall terminal unit for oxygen and are used to control the flow of oxygen in inhalation and insufflation. Flow rates can be set with a high degree of accuracy. The large rotary knob makes setting easier.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 40 × 130 mm (6.3 × 1.6 × 5.1 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 500 g (1.1 lb)

A **O_2 flowmeter, 4 l/min, CS, DIN, ISO and neutral color, M34×1.5 and 9/16“ for accessories and sterile water systems** — **MP04551**

B **O_2 flowmeter, 16 l/min, CS, DIN, ISO and neutral color, M34×1.5 and 9/16“ for accessories and sterile water systems** — **MP04558**

C **O_2 flowmeter, 16 l/min, CS, long CS plug (6 cm; 2.4 in), DIN, ISO and neutral color, M34×1.5 and 9/16“ for accessories and sterile water systems** — **MP04561**

FLOWMETER

TWIN FLOWMETER

The particular advantage of the twin flowmeter is, that two patients can be treated simultaneously and independently of one another, while occupying only one wall terminal.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 150 × 190 mm (6.3 × 5.9 × 7.15 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 900 g (1.98 lb)

A **O_2 twin flowmeter, 2 × 16 l/min, CS, DIN, ISO, neutral color, M34×1.5 and 9/16“ for accessories and sterile water systems** — **MP04560**

FLOWMETER

These O_2 flowmeters for rail attachment can be used to control the flow of oxygen in inhalation and insufflation. Flow rates up to 4 and 16 l/min can be set with a high degree of accuracy. The large rotay knob makes setting easier. Using the rail clamp, the flowmeter can be quickly and safely attached to all rail profiles. The connection to the gas supply can be ensured by a CS hose with NIST coupling nut.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 40 × 130 mm (6.3 × 1.6 × 5.1 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 950 g (2.09 lbs)

FLOWMETER

These flowmeters are plugged directly into a wall terminal unit for medical air and are used to control the flow of medical air for aerosoltherapy. Flow rates of up to 16 or 32 l/min can be set with a high degree of accuracy. The large rotary knob makes setting easier. With integrated sintered filter.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 40 × 130 mm (6.3 × 1.6 × 5.1 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 500 g (1.1 lb)

FLOWMETER

These Flowmeters for rail attachment can be used to control the flow of medical air for aerosol therapy. Flow rates of up to 16 l/min can be set with a high degree of accuracy.
The large setting knob makes setting easier. Using the rail clamp, the flowmeter can be quickly and safely attached to standard rail profiles. The connection to the gas supply can be ensured by a CS hose with NIST coupling nut.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 40 × 130 mm (6.3 × 1.6 × 5.1 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 950 g (2.09 lbs)

OXYMIXER

1.2 OXYMIXER*

Oxymixer enables a continuous and individually adjusted mixture of medical air and medical oxygen to be administered to infants, children and adults. The O_2 concentration is easily adjusted to a highly accurate flow – even with flow rates of less than 3 l/min.

	Oxymixer configuration	**MP04200**
	Free choice of Low- or High Flow Blender with: 1 or 2 flowmeter, NIST or DISS gas inlet, Monitor, Bleed swith, Nozzle, Sound damper. The rail fixation is included.	
A	**Oxymixer High Flow**	**MP04201**
	Including: Rail clamp, Flowmeter 0 – 32 l/min right, Flowmeter 0 – 85 l/min left.	
B	**Oxymixer High Flow with monitor**	**MP04202**
	Including: Rail clamp, Flowmeter 0 – 32 l/min right, Flowmeter 0 – 85 l/min left, Monitor, Oxygen sensor, Oxygen sensor cable, Sensor receptacle.	
C	**Oxymixer Low Flow**	**MP04203**
	Including: Rail clamp, Flowmeter 0 – 3 l/min right, Flowmeter 0 – 15 l/min left, Bleed on/off switch.	
D	**Oxymixer Low Flow with monitor**	**MP04204**
	Including: Rail clamp, Flowmeter 0 – 3 l/min right, Flowmeter 0 – 15 l/min left, Bleed on/off switch, Monitor, Oxygen sensor, Oxygen sensor cable, Sensor receptacle.	
E	**Oxymixer Low Flow with 1 – 15 l flowmeter right, rail clamp**	**MP04229**
F	**Multi-P trolley* equipped**	**MP13020**
	Including base with 5 castors, 38 mm Ø pole, 3 rail clamps, basket.	
G	**Multi-P trolley***	**MP13021**
	Including base with 5 castors and 38 mm Ø pole for accessories.	

Several hoses to connect Oxymixer with the central supply.
For CS hoses please refer to chapter "Accessory for gas supply".

PRESSURE REDUCER

1.3 PRESSURE REDUCER

A **Pressure reducer OxyLine, customized configuration of pressure reducers** — **MP00100**

OxyLine's modular design means you can accurately choose the pressure reducer you need from the following components:

- O_2 or AIR pressure reducer with 200 bar technology
- Manometer, vertical or horizontal
- Flow regulator settings (1, 2, 3, 4, 6, 8, 12 and 15 l/min) and 9/16" sterile water connector
- Flowmeter for up to 16 l/min with connector for Dräger reusable humidifier, sterile water connector and 6 mm (0.2 in) nozzle for an oxygen mask
- Self-closing NIST connector
- Centralized gas supply coupling, e.g. to connect up a mains-operated ventilation device
- Ejector for short-time suction of eg. secret

Type:	Single-stage pre-set pressure reducer
Permissible inlet pressure range:	11 to 200 kPa × 100
Nominal outlet pressure (p2):	non-adjustable, output pressure as per rating plate
Weight:	1.2 kg to 2 kg (depending on connector type)
Material:	Brass with chemical nickel surface

PRESSURE REDUCER

Oxett

Oxett is a portable oxygen supply unit for mobile use. Oxett ensures consistent treatment, because the device can be mounted to bed, rail and stretcher. All devices for inhalation, insufflation and suction are available on a solid aluminum plate. Precise O_2 delivery is handled through the pressure compensated flow meter or the compact flowmeter. Manual or automatic short-term ventilation is even possible, because the Oxylog® can be connected via the O_2 standard coupling. The portable Oxett unit meets the requirements of daily hospital and emergency medical practice in a simple way. It removes all well-practiced temporary supply solutions.

MEDICAL ASPIRATION

2.1 Bronchial aspiration

Dräger offers an extensive line of bronchial aspirators, while also providing individual solutions to meet your specific needs in the ICU and OR. Generally you have the choice between vacuum, medical air or oxygen as the drive gas. We differ by the driving units between the ejectors and the vacuum regulators. In addition, we can supply the attachments and hose brackets you need to ensure an ergonomically efficient workplace. You could also choose the connection you require and the fitting jar system. We offer reusable solutions as well as disposables.

BRONCHIAL ASPIRATION

2. MEDICAL ASPIRATION

2.1 BRONCHIAL ASPIRATION

The vacuum regulator is connected directly to a central vacuum supply system or to rails. The vacuum is infinitely variable up to max. -90 kPa (-900 mbar) and is shown on a turnable, manually adjustable pressure gauge. Shut-off valve is included.
You can use the VarioSafe® disposable filter system to reliably protect the **VarioVac®** series and the central vacuum system against contamination. A VarioSafe® filter system is included with every VarioVac® vacuum regulator.

Technical data:

Maximum vacuum:	-90 to 0 kPa (-900 to 0 mbar)
Maximum suction flow:	55 l/min
Weight:	600 to 800 g 800 g for rail version 1,700 g for dual version (MP00516)
Dimensions (W/H/D) in mm:	80 × 210 × 160 (without VarioSafe) 80 × 340 × 160 (with VarioSafe) MP00516 for dual version: 200 × 210 × 210 (without VarioSafe) 200 × 340 × 210 (with VarioSafe)
Maximum sound level:	43 dB(A)
Hose nozzle:	Ø 6 mm

Additional Information for Filter:

Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

BRONCHIAL ASPIRATION

VarioVac® vacuum regulator for rail.
The gas supply is ensured by VAC connection hose.
This rail version can be connected to all standard wall rails (10 mm width and 25 mm height).
You can use the VarioSafe® disposable filter system to reliably protect the VarioVac® series and the central vacuum system against contamination.
A VarioSafe® filter system is included with every VarioVac® vacuum regulator.

Technical data:	VarioVac P (MP00660, MP03223)
Maximum vacuum:	-55 to 0 kPa (-550 to 0 mbar)
Maximum suction flow:	20 l/min
Maximum sound level:	40 dB(A)
	VarioVac B/OP (MP03222)
Maximum vacuum:	-90 to 0 kPa (-900 to 0 mbar)
Maximum suction flow:	55 l/min
Maximum sound level:	43 dB(A)
Weight:	800 g
Dimensions (W/H/D) in mm:	80 × 210 × 160 (without VarioSafe)
	80 × 340 × 160 (with VarioSafe)
Hose nozzle:	Ø 6 mm

BRONCHIAL ASPIRATION

The **VarioAir®** ejector is connected directly to a medical air supply system or to rails. The low-noise ejector generates a vacuum up to max. -90 kPa (-900 mbar) and shows the vacuum level on a turnable, manually adjustable pressure gauge.
All devices offer a pressure relief valve (ex 0.1 kPa) to avoid pressure increase at the patient side.
The vacuum adjusting knob is also the on/off switch to interrupt the suction without reset the values.
A new VarioSafe® disposable filter system reliably protects the VarioAir® series and the patient environment against contamination. One piece of the new VarioSafe® filter system is always included.

Technical data:

Maximum vacuum:	-90 to 0 kPa (-900 to 0 mbar)
Minimum suction flow:	40 l/min
Inlet pressure range:	4 to 5.5 bar
Maximum gas consumption:	55 l/min
Weight:	800 g
Dimensions (W/H/D) in mm:	80 × 200 × 160 (without VarioSafe)
	80 × 330 × 160 (with VarioSafe)
Maximum sound level:	57 dB(A)
Hose nozzle:	Ø 6 mm
Pressure relief valve:	Ex 0.1 kPa (1 mbar)

BRONCHIAL ASPIRATION

Extra lightweight portable secretion jar set for bronchial aspiration. The set is made of high quality and extremely robust plastic and can be autoclaved at up to 134 °C. The two 700 ml jars, which are used as secretion and rinsing jars, are identical, making hospital logistics considerably easier. The jars are made of high quality polysulfone, are reusable, extremely robust and implosion proof. The long service lifes makes the jars both environmentally friendly and cost effective.
An automatic overflow safeguard is fitted in the secretion jar cap to prevent secretion from entering the drive unit and the piped medical gas supply. The ergonomically shaped handle is positioned exactly at the units centre of gravity, making it easy to transport the secretion jar set quickly.

BRONCHIAL ASPIRATION

VacuSmart® disposable cartridge for bronchial suction
VacuSmart® is a disposable cartridge for 700 ml secretion jars. This product has been specifically designed and thoroughly tested to work with Dräger suction units. Therefore there is absolutely no need to modify the installed base. An integrated hydrophobic filter acts as an overflow safeguard by stopping suction of secretion once maximum capacity has been reached. The closed and leakproof system, optional with an integrated gelling agent, reduces the risk of cross contamination to a minimum.
The optional gelling agent prevent leakages e.g. during the waste disposal in a waste press. The gelling agent is secured in a water soluble bag.

Technical data:

Maximum capacity:	700 ml
Maximum capacity up to the overflow safeguard:	1,000 ml
Overflow safeguard:	Integrated, hydrophobic filter
Recommended duration of use:	24 h
Gelling agent:	Sodium polyacrylate

A	**Secretion jar VacuSmart®, PE (Polyethylene), disposable, 700 ml, 25 pcs.**	**MX23023**

MEDICAL ASPIRATION

2.2 OR aspiration

During surgical, endoscopical and minimally invasive procedures you do not have to abandon the easy use of these products.
A modular design facilitates the easy replacement of components and allows the system to be upgraded with any of Dräger's rail-mounted accessories. The negative pressure can be generated either by a vacuum regulator or an ejector.

An overflow safeguard in the secretion jar and an additional protection jar reduce the risk of contamination of the drive element and the pressure or vacuum generating system.
The OR aspirators can be connected either to the central vacuum system or, when used with an ejector drive unit, to the piped oxygen or medical air supply system.

2.2 OR ASPIRATION

A Vacuum regulator VarioVac® B/OR Rail, for bronchial and OR suction, gas connection NIST VAC — **MP00505**

Technical data:

Maximum vacuum:	-90 to 0 kPa (-900 to 0 mbar)
Maximum suction flow:	55 l/min
Weight:	600 to 800 g (800 g for rail versions)
Dimensions (W/H/D) in mm:	80 × 200 × 160 (without VarioSafe) 80 × 330 × 160 (with VarioSafe)
Maximum sound level:	43 dB(A)
Hose nozzle:	Ø 6 mm
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

* Test has been performed by Drägerwerk AG & Co. KGaA, Dec 2020, Lübeck, Germany
** Test has been performed by Nelson Laboratories Inc., Dec 2020, Salt Lake City, USA
*** Test has been performed by Dräger Safety AG & Co. KGaA, March 2021, Lübeck, Germany, according to EN ISO 23328-1

B Vacuum regulator dual VarioVac® B/OR Rail, for bronchial and OR suction, gas connection NIST VAC — **MP00516**

Weight:	1,700 g
Dimensions (W/H/D) in mm:	200 × 210 × 210 (without VarioSafe) 200 × 340 × 210 (with VarioSafe)

C Ejector VarioAir® B/OR Rail, for bronchial and OR suction, gas connection NIST AIR — **MP00535**

C Ejector VarioO2® B/OR Rail, for bronchial and OR suction, gas connection NIST O_2 — **MP00552**

Technical data:

Maximum vacuum:	-90 to 0 kPa (-900 to 0 mbar)
Minimum suction flow:	40 l/min
Inlet pressure range:	4 to 5.5 bar
Maximum gas consumption:	55 l/min
Weight:	800 g
Dimensions (W/H/D) in mm:	80 × 210 × 160 (without VarioSafe) 80 × 340 × 160 (with VarioSafe)
Maximum sound level:	57 dB(A)
Hose nozzle:	Ø 6 mm
Pressure relief valve:	Ex 0.1 kPa (1 mbar)
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**

MEDICAL ASPIRATION

2.3 Continuous and thoracic drainages

Continuous drainages are used for drainage of secretion, blood and/or air from body cavities over long periods, following operations, particularly after open-thorax surgery.

All of Dräger's continuous drainages are made from high-quality materials and are designed with space in mind.
Individual solutions allows you to choose between pneumatic or electrical driven drainages, while also assisting you in optimizing your specific needs and requirements.

CONTINUOUS AND THORACIC DRAINAGES

2.3 CONTINUOUS AND THORACIC DRAINAGES

The vacuum regulator is directly connected to a central vacuum supply, or mounted on a rail. The smoothly adjustable vacuum, up to max. -160 mbar (-16 kPa), is displayed on a rotating manometer, legible from all sides.
All vacuum regulators include a shut-off valve.
You can use the VarioSafe® disposable filter system to reliably protect the **VarioVac®** series and the central vacuum system against contamination. A VarioSafe® filter system is included with every VarioVac® vacuum regulator.

Technical data:

Maximum vacuum:	-16 to 0 kPa (-160 to 0 mbar)
Maximum suction flow:	18 l/min
Weight:	600 to 800 g (800 g for rail versions)
Dimensions (W/H/D) in mm:	80 × 210 × 160 (without VarioSafe) 80 × 340 × 160 (with VarioSafe)
Maximum sound level:	50 dB(A)
Hose nozzle:	Ø 6 mm
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

CONTINUOUS AND THORACIC DRAINAGES

The **VarioAir®** ejector is connected directly to a medical air supply system or to rails. The low-noise ejector generates a vacuum up to max. -16 kPa (-160 mbar) and shows the vacuum level on a turnable, manually adjustable pressure gauge. All devices offer a pressure relief valve (ex 0.1 kPa) to avoid pressure increase at the patient side.
A new VarioSafe® disposable filter system reliably protects the VarioAir® series and the patient environment against contamination. One piece of the new VarioSafe® filter system is always included.

Technical data:

Maximum vacuum:	-16 to 0 kPa (-160 to 0 mbar)
Maximum suction flow:	18 l/min
Inlet pressure range:	4 to 5.5 bar
Maximum gas consumption:	25 l/min
Weight:	800 g
Dimensions (W/H/D) in mm:	80 × 200 × 160 (without VarioSafe) 80 × 330 × 160 (with VarioSafe)
Maximum sound level:	45 dB(A)
Hose nozzle:	Ø 6 mm
Pressure relief valve:	Ex 0.1 kPa (1 mbar)
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

CONTINUOUS AND THORACIC DRAINAGES

The vacuum can either be generated by an ejector or via a vacuum regulator. When used with the ejector, a bacterial filter reliably protects against contamination of the environment. All these pneumatic continuous drainages can be used in potentially explosive areas.
All parts which may become contaminated can be autoclaved at up to 134 °C.
The continuous drainage systems 1 and 3 can be used for continuous- and wound drainage as well as for thoracic drainage in the combination with a regulator from the VarioVac® D and VarioAir® D series. An additional precision regulator make it easy to adjust lowest vacuum levels.

CONTINUOUS AND THORACIC DRAINAGES

A Bacterial filter 767, 5 pcs. **6723976**

A Bacterial filter 767, disposable, for ejectors (model range until 2010) **CH00102**

The filter 767 reliably protects the ejector and the patient environment against contamination.

Technical data:

Material:	PS (polystyrol)
Recommended duration of use:	7 days
Additional Information for Filter:	
Bacterial retention:	99.992%****
Viral retention:	99.99%****

****According to EN 1822-1:1998 Filter for suspended particles (HEPA and ULPA)

B Bacterial filter disposable, 20 pcs. **MK00514**

You can use the bacterial filter to reliably protect the suction devices against contamination.

Technical data:

Material:	Acryl
Recommended duration of use:	7 days
Additional Information for Filter:	
Bacterial retention:	99.99997%*
Viral retention:	99.99997%*
NaCl retention:	99.9982%**

* Test has been performed by Nelson Laboratories Inc., Dec 2020, Salt Lake City, USA

** Test has been performed by Dräger Safety AG & Co. KGaA, March 2021, Lübeck, Germany, according to EN ISO 23328-1

C Bacterial and viral filter system VarioSafe, for VarioAir®, VarioVac®, VarioO2, disposable, 10 pcs. **MP00555**

The new VarioSafe® disposable filter system reliably protects the VarioAir®, VarioVac® and VarioO2 series and the patient environment against contamination.

Technical data:

Material:	PS (polystyrol)
Recommended duration of use:	7 days
Maximum capacity:	90 ml
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

* Test has been performed by Drägerwerk AG & Co. KGaA, Dec 2020, Lübeck, Germany

Rail accessories
and examination lights

Workstations designed with healing in mind

Hospital lighting has a vital impact on the health and well-being of your patients. Our smart solutions equip you with ideally suited lightning, giving you excellent illumination and working conditions.

Sophisticated without being complicated, our Quickstop hinged arms are easy to handle, allowing you more flexibility for improved patient care.

We can help you conceptualise your hospital installations with intelligent workstations integrated with complementing accessory products for safer and more optimised patient care.

CONTENT RAIL ACCESSORIES AND EXAMINATION LIGHT

1.	Rail accessories	339
2.	Examination light	340
3.	Hinged arms	342

RAIL ACCESSORIES AND EXAMINATION LIGHT

1. RAIL ACCESSORIES

A	Rail clamp, for attachment to poles of different diameters, rotable by 90° to left and right, length of standard rail (profile 25 × 10 mm): 20 cm	2M85274
B	Rail clamp lever type, for attachment of devices to 25 × 10 mm standard rail, for compact suction unit and secretion jar set	M26842
C	CS connection hose holder	2M85446
D	Suction hose holder, suitable for various diameters	2M85239
E	Ceiling holder, rail holder for compact suction systems and secretion jar sets	2M85119

Wire baskets*

The wire baskets are used for storage of disposable catheters or dispoables gloves. The catheters can be simply stored in bundles and are then easy to take out one by one. The baskets are chromeplated and are thus easy to clean and can be autoclaved at up to 134 °C. The amount of space for a basket on the rails is around 150 mm (5.9 in).

F	Basket 150, 15 × 20 × 10 cm, e.g., for disposable gloves	M26146
F	Basket 300, 15 × 28 × 10 cm, e.g., for 300 mm catheters	M26145
F	Basket 600, 15 × 48 × 10 cm, e.g., for 600 mm catheters	M25121
G	Litter bag holder, stainless steel, with base plate and litter bags (100 pcs.)	M24695
	Litter bags, disposable, for litter bag holder, 100 pcs.	M26240

RAIL ACCESSORIES AND EXAMINATION LIGHT

2. EXAMINATION LIGHT

The Dräger **VarioLux®** offers cool, highly efficient, and variable intensity examination light and was specially designed for use in neonatology and pediatric settings. Made for single-handed operation, it features adjustable color temperature settings as well as a dimmer function.

Operating mode:	Continuous operation
Weight:	1.5 kg (3.3 lbs)
Electrical values:	100 – 240 V, 50/60 Hz
Max. illumination intensity Ec at 0.5 m:	30,000 lx
Dimming levels:	30,000 lx, 24,000 lx, 18,000 lx, 12,000 lx, 7,000 lx
Light field diameter d10 at 0.5 m:	20 cm (7.9 in)
Light field diameter d50 at 0.5 m:	9 cm (3.5 in)
Color temperature adjustable:	Cool white (blue) 4,700 K, Neutral white (white) 4,100 K, Warm white (red) 3,500 K
Min. service life of bulb (LEDs):	> 50,000 h
Color reproduction index:	Ra>= 96 (at 3,500 K) R9 = 89 (at 3,500 K)
Max. radiant power at 0.5 m:	105 W/m²

RAIL ACCESSORIES AND EXAMINATION LIGHT

3. HINGED ARMS

Keeping everything close at hand. To leave your hands free to care for the patient, all the joints can be fixed into place and released with just one quick hand movement.
All cables, lines and hose systems can be arranged in such a way as to more or less completely prevent accidental disconnection.

A	**Hinged arm Infinity® ACS, for positioning and fixation of breathing hoses, this arm can be fixed into place without a hand movement through a patent registered friction torque-breaking system, length 1,080 mm, max. load 0.5 kg, includes hose clamps: MP00693 (1×), 8417396 (2×)**	**MP00690**
B	**Hinged arm 240°, 3 hinges, fixable, ball holder system, length 1,155 mm, max. load 0.3 kg, includes hose clamps: MP00493 (1×), 8409841 (1×)**	**8409609**
C	**Hinged arm Quickstop 2, with universal ball holder system for optional accessories length 858 mm, max. load 0.4 kg, includes hose clamps: MP00493 (1×), 8404761 (2×), 8409841 (1×)**	**2M85706**
D	**Hinged arm Quickstop short, with mounted universal tube holder plate, for various tube dimensions/coaxial hoses, specifically designed for OR tables, length 323 mm, max. load 1 kg**	**2M86463**

Neonatal care and thermoregulation

Improving care for your smallest of patients

The majority of all neonatal deaths (75%) occurs during the first week of life[1)]. This sobering reality drives us to develop gentle and efficient solutions for improving acute care in neonatal intensive care units. Together with you, our goal is to lower morbidity and mortality rates while reducing stress for newborns and clinical staff.

We understand that "small" doesn't mean less important. And that's why we give our accessories and consumables the highest level of attention – so that when you need to give your tiniest patients the best possible care, you can rely on our smallest products for:

- Thermoregulation,
- neonatal respiratory support,
- vital sign monitoring,
- jaundice treatment,
- and so much more.

To help you do just that – save lives.

OXYMIXER*

Oxymixer enables a continuous and individually adjusted mixture of medical air and medical oxygen to be administered to infants, children and adults. The O_2 concentration is easily adjusted to a highly accurate flow – even with flow rates of less than 3 l/min.

	Oxymixer configuration	**MP04200**
	Free choice of Low- or High Flow Blender with: 1 or 2 flowmeter, NIST or DISS gas inlet, Monitor, Bleed swith, Nozzle, Sound damper. The rail fixation is included.	
A	**Oxymixer Low Flow**	**MP04203**
	Including: Rail clamp, Flowmeter 0 – 3 l/min right, Flowmeter 0 – 15 l/min left, Bleed on/off switch.	
B	**Oxymixer Low Flow with monitor**	**MP04204**
	Including: Rail clamp, Flowmeter 0 – 3 l/min right, Flowmeter 0 – 15 l/min left, Bleed on/off switch, Monitor, Oxygen sensor, Oxygen sensor cable, Sensor receptacle.	
C	**Oxymixer Low Flow with 1 – 15 l flowmeter right, rail clamp**	**MP04229**

Several hoses to connect Oxymixer with the central supply.
For CS hoses please refer to chapter "Accessory for gas supply".

VENTILATION ACCESSORIES

SEATTLE PAP PLUS – BUBBLE CPAP SYSTEM

Helping infants with respiratory distress breathe easier. The Seattle-Positive Airway Pressure (PAP) system is an innovation, which uses the proven advantages of Bubble CPAP therapy, such as oscillatory effects similarto high frequency ventilation and combines it with an unique design.
Seattle-PAP plus is safe, effective and easy to use.
It was designed to:

- Promote infant safety with a uniquely designed pressure manifold with pressure relief valve.
- Safety tube lock to avoid unintended changes of the PEEP level.
- Provide comfort and optimum CPAP support to the infant due to disposable BabyFlow® plus interfaces complementing the system.
- Include funnel with the filling tube which minimises spillages.
- The swivel connector to the expiratory limb prevents unneccessary disconnections and pressure loss.
- The water trap in the expiratory limb prevents unwanted presssure peaks due to condensation in the expiratory limb.

It requires only oxygen and compressed air, both to be administered by an O_2 blender like the Oxymixer from Dräger and a humidification source for the circuit.

VENTILATION ACCESSORIES

The TwinStar® Plus filter/HME from Dräger is a combination of an efficient HME and a high-performance breathing system filter, thereby significantly contributing to infection prophylaxis in ventilation treatment.

- Combination of efficient HME and high-performance breathing system filter
- High retention rates for bacteria and viruses
- High return of moisture
- Sampling connector with tethered cap
- Transparent housing for visual control
- Standardized connectors for safe connection to other components

A	**Filter + HME TwinStar® 9 Plus*, disposable, ~9 ml deadspace, 100 pcs.**	**MP05820**

HumidStar® Plus moisture exchangers from Dräger partially take over the function of the upper airways and efficiently humidify the inspired air.

- High return moisture
- Sampling connector with tethered cap
- Transparent housing for visual control
- Standardized connectors for safe connection to other components

B	**HME HumidStar® 2 Plus, disposable, 2 ml deadspace, 100 pcs.**	**MP05845**

WARD EQUIPMENT

5. WARD EQUIPMENT

Please find more information in chapter 5 „Ward equipment“.

FLOWMETER

A

D-940-2016

These O_2 Flowmeters are plugged directly into a wall terminal unit for oxygen and are used to control the flow of oxygen in inhalation and insufflation. Flow rates can be set with a high degree of accuracy. The large rotary knob makes setting easier.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 40 × 130 mm (6.3 × 1.6 × 5.1 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 500 g (1.1 lb)

A **O_2 flowmeter, 4 l/min, CS, DIN, ISO and neutral color, M34×1.5 and 9/16“ for accessories and sterile water systems** **MP04551**

Not all articles are available worldwide.

WARD EQUIPMENT

TWIN FLOWMETER

The particular advantage of the twin flowmeter is, that two patients can be treated simultaneously and independently of one another, while occupying only one wall terminal.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 150 × 190 mm (6.3 × 5.9 × 7.15 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 900 g (1.98 lb)

A

A	**O_2 twin flowmeter, CS, 2 × 16 l/min, CS, DIN, ISO, neutral color, M34×1.5 and 9/16“ for accessories and sterile water systems**	**MP04560**
	O_2 twin flowmeter, 2 × 16 l/min, rail fitting with NIST gas inlet, 2 × M34×1.5, adapter 9/16“	**MP04569**

Not all articles are available worldwide.

WARD EQUIPMENT

These O_2 flowmeters for rail attachment can be used to control the flow of oxygen in inhalation and insufflation. Flow rates up to 4 and 16 l/min can be set with a high degree of accuracy. The large rotay knob makes setting easier. Using the rail clamp, the flowmeter can be quickly and safely attached to all rail profiles. The connection to the gas supply can be ensured by a CS hose with NIST coupling nut.

Accuracy of flow rate at 4.5 bar ± 0.5 bar (1,013 hPa/20 °C)**
± 15% (corresponding to smallest setting value)
± 10% (all other setting values)
** Using the flowmeters outside the specified ambient conditions could affect flow accuracy.

Dimensions (H × W × D):	160 × 40 × 130 mm (6.3 × 1.6 × 5.1 in)
Material:	Housing: Aluminium Pressure dome: Polyamide Flow indicator: Glass
Weight:	Approx. 950 g (2.09 lbs)

A **O_2 flowmeter, 4 l/min, rail with NIST gas inlet, M34×1.5 and 9/16“ for accessories and sterile water systems** — **MP04552**

B **O_2 flowmeter, 4 l/min, rail, 90°, NIST gas inlet, M34×1.5 and 9/16“ for accessories and sterile water systems** — **MP04553**

C **O_2 flowmeter, 16 l/min, rail, NIST gas inlet, M34×1.5, adapter 9/16“** — **MP04567**

CS hoses

Several hoses to connect flowmeter with the central supply.
For CS hoses please refer to chapter "Accessory for gas supply".

WARD EQUIPMENT

MEDICAL ASPIRATION

A

D-10309-2011

The vacuum regulator is directly connected to a central vacuum supply, or mounted on a rail. The smoothly adjustable vacuum, up to max. -160 mbar (-16 kPa), is displayed on a rotating manometer, legible from all sides.
All vacuum regulators include a shut-off valve.
You can use the VarioSafe® disposable filter system to reliably protect the **VarioVac®** series and the central vacuum system against contamination. A VarioSafe® filter system is included with every VarioVac® vacuum regulator.

Technical data:

Maximum vacuum:	-16 to 0 kPa (-160 to 0 mbar)
Maximum suction flow:	18 l/min
Weight:	600 to 800 g (800 g for rail versions)
Dimensions (W/H/D) in mm:	80 × 210 × 160 (without VarioSafe) 80 × 340 × 160 (with VarioSafe)
Maximum sound level:	50 dB (A)
Hose nozzle:	Ø 6 mm
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

* Test has been performed by Drägerwerk AG & Co. KGaA, Dec 2020, Lübeck, Germany
** Test has been performed by Nelson Laboratories Inc., Dec 2020, Salt Lake City, USA
*** Test has been performed by Dräger Safety AG & Co. KGaA, March 2021, Lübeck, Germany, according to EN ISO 23328-1

A Vacuum regulator VarioVac® D Rail, for continuous and wound drainage, gas connection VAC **MP00511**

For CS hoses please refer to chapter „Accessory for gas supply“.

Not all articles are available worldwide.

WARD EQUIPMENT

VarioVac® vacuum regulator for rail.
The gas supply is ensured by VAC connection hose.
This rail version can be connected to all standard wall rails (10 mm width and 25 mm height).
You can use the VarioSafe® disposable filter system to reliably protect the VarioVac® series and the central vacuum system against contamination.
A VarioSafe® filter system is included with every VarioVac® vacuum regulator.

Technical data:
VarioVac P (MP00660, MP03223)

Maximum vacuum:	-55 to 0 kPa (-550 to 0 mbar)
Maximum suction flow:	20 l/min
Maximum sound level:	40 dB(A)
Weight:	800 g
Dimensions (W/H/D) in mm:	80 × 210 × 160 (without VarioSafe)
	80 × 340 × 160 (with VarioSafe)
Hose nozzle:	Ø 6 mm

Additional Information for Filter:

Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**

B

D-10296-2011

A Vacuum regulator VarioVac® P Rail, for bronchial suction, gas connection NIST VAC, for connection to all standard wall rails **MP00660**

The bronchial aspirator can be used in magnets with static magnetic fields of 1.5 tesla and 3 tesla.
Minimum distance from the center of the magnetic field: Magnetic flux density of 40 millitesla (400 gauss).

B Vacuum regulator VarioVac® MRI P Rail, for bronchial suction, gas connection NIST VAC, for connection to all standard wall rails **MP03223**

For CS hoses please refer to chapter „Accessory for gas supply“.

Not all articles are available worldwide.

WARD EQUIPMENT

Drive unit VarioVac® and jar set are joined together, so that you have a complete, convinient and easy solution. The ergonomically shaped handle is positioned exactly at the units centre of gravity, making it easy to transport the aspirator quickly. The gas supply is ensured by CS connection hose. You can use the VarioSafe® disposable filter system to reliably protect the device and the patient environment against contamination.
This rail version can be connected to all standard wall rails (10 mm width and 25 mm height).

A

D-10322-2011

Technical data:

Weight:	1,600 g (empty)
Dimensions (W/H/D) in mm:	300 × 440 × 160
Hose nozzle:	Ø 6 mm
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*

A	**Vacuum regulator VarioVac® P compact, for bronchial suction, gas connection NIST VAC, including secretion jar set and integrated vacuum regulator**	**MP00661**

Technical data:

Maximum vacuum:	-55 to 0 kPa (-550 to 0 mbar)
Maximum suction flow:	20 l/min
Maximum sound level:	40 dB(A)

For CS hoses please refer to chapter „Accessory for gas supply“.

Not all articles are available worldwide.

WARD EQUIPMENT

The **VarioAir®** ejector is connected directly to a medical air supply system or to rails. The low-noise ejector generates a vacuum up to max. -16 kPa (-160 mbar) and shows the vacuum level on a turnable, manually adjustable pressure gauge. All devices offer a pressure relief valve (ex 0.1 kPa) to avoid pressure increase at the patient side.
A new VarioSafe® disposable filter system reliably protects the VarioAir® series and the patient environment against contamination. One piece of the new VarioSafe® filter system is always included.

A

D-28534-2009

Technical data:

Maximum vacuum:	-16 to 0 kPa (-160 to 0 mbar)
Maximum suction flow:	18 l/min
Inlet pressure range:	4 to 5.5 bar
Maximum gas consumption:	25 l/min
Weight:	800 g
Dimensions (W/H/D) in mm:	80 × 200 × 160 (without VarioSafe)
	80 × 330 × 160 (with VarioSafe)
Maximum sound level:	45 dB (A)
Hose nozzle:	Ø 6 mm
Pressure relief valve:	Ex 0.1 kPa (1 mbar)
Additional Information for Filter:	
Aerosole and Fluid retention:	100% (with VarioSafe)*
Bacterial retention:	99.99997% (with VarioSafe)**
Viral retention:	99.99922% (with VarioSafe)**
NaCl retention:	99.8900% (with VarioSafe)***

A Ejector VarioAir® P compact, for bronchial suction, gas connection NIST AIR, including secretion jar set and integrated ejector — **MP00547**

Technical data:

Maximum vacuum:	-48 to 0 kPa (-480 to 0 mbar)
Maximum suction flow:	20 l/min
Inlet pressure range:	4 to 5.5 bar
Maximum gas consumption:	40 l/min
Maximum sound level:	47 dB(A)
Pressure relief valve:	Ex 0.1 kPa (1 mbar)

For CS hoses please refer to chapter „Accessory for gas supply“.

WARD EQUIPMENT

Extra lightweight portable secretion jar set for bronchial aspiration. The set is made of high quality and extremely robust plastic and can be autoclaved at up to 134 °C. The two 700 ml jars, which are used as secretion and rinsing jars, are identical, making hospital logistics considerably easier. The jars are made of high quality polysulfone, are reusable, extremely robust and implosion proof. The long service lifes makes the jars both environmentally friendly and cost effective.
An automatic overflow safeguard is fitted in the secretion jar cap to prevent secretion from entering the drive unit and the piped medical gas supply. The ergonomically shaped handle is positioned exactly at the units centre of gravity, making it easy to transport the secretion jar set quickly.

A

D-7354-2011

A	**Secretion jar set, with 700 ml secretion jars (2 pcs.) and 1.5 m suction hose, maximum capacity up to the overflow safeguard 2 × 1,000 ml, scale in steps of 10 ml up to max. 700 ml**	**2M85056**

WARD EQUIPMENT

VacuSmart disposable cartridge for bronchial suction
VacuSmart is a disposable cartridge for 700 ml secretion jars. This product has been specifically designed and thoroughly tested to work with Dräger suction units. Therefore there is absolutely no need to modify the installed base. An integrated hydrophobic filter acts as an overflow safeguard by stopping suction of secretion once maximum capacity has been reached. The closed and leakproof system, optional with an integrated gelling agent, reduces the risk of cross contamination to a minimum.
The optional gelling agent prevent leakages e.g. during the waste disposal in a waste press. The gelling agent is secured in a water soluble bag.

Technical data:

Maximum capacity:	700 ml
Maximum capacity up to the overflow safeguard:	1,000 ml
Overflow safeguard:	Integrated, hydrophobic filter
Recommended duration of use:	24 h
Gelling agent:	Sodium polyacrylate

A	**Secretion jar VacuSmart®, PE (Polyethylene), disposable, 700 ml, 25 pcs.**	**MX23023**
B	**Secretion jar VacuSmart® Gel, PE (Polyethylene), disposable, 700 ml, 25 pcs.**	**MX23025**
C	**Suction tube VacuSmart® Tube, PE (Polyethylene), disposable, 2 m, w/ finger tip, 25 pcs.**	**MX23026**

You can also enjoy some smart savings by choosing any of the following packing unit 25 pieces sets:

D	**Suction set, disposable, VacuSmart®, 700 ml and VacuSmart® Tube, 25 pcs. each**	**MP00061**
D	**Set VacuSmart® Gel and Tube, 25 pcs.**	**MP03211**

RAIL ACCESSORIES AND EXAMINATION LIGHT

6. RAIL ACCESSORIES AND EXAMINATION LIGHT

RAIL ACCESSORIES

Wire baskets*

The wire baskets are used for storage of disposable catheters or dispoables gloves. The catheters can be simply stored in bundles and are then easy to take out one by one. The baskets are chromeplated and are thus easy to clean and can be autoclaved at up to 134 °C. The amount of space for a basket on the rails is around 150 mm (5.9 in).

A	**Basket 150, 15 × 20 × 10 cm, e.g., for disposable gloves**	**M26146**
A	**Basket 300, 15 × 28 × 10 cm, e.g., for 300 mm catheters**	**M26145**
A	**Basket 600, 15 × 48 × 10 cm, e.g., for 600 mm catheters**	**M25121**
B	**Litter bag holder, stainless steel, with base plate and litter bags (100 pcs.)**	**M24695**
	Litter bags, disposable, for litter bag holder, 100 pcs.	**M26240**

RAIL ACCESSORIES AND EXAMINATION LIGHT

EXAMINATION LIGHT

The Dräger **VarioLux®** offers cool, highly efficient, and variable intensity examination light and was specially designed for use in neonatology and pediatric settings. Made for single-handed operation, it features adjustable color temperature settings as well as a dimmer function.

Operating mode:	Continuous operation
Weight:	1.5 kg (3.3 lbs)
Electrical values:	100 – 240 V, 50/60 Hz
Max. illumination intensity Ec at 0.5 m:	30,000 lx
Dimming levels:	30,000 lx, 24,000 lx, 18,000 lx, 12,000 lx, 7,000 lx
Light field diameter d10 at 0.5 m:	20 cm (7.9 in)
Light field diameter d50 at 0.5 m:	9 cm (3.5 in)
Color temperature adjustable:	Cool white (blue) 4,700 K, Neutral white (white) 4,100 K, Warm white (red) 3,500 K
Min. service life of bulb (LEDs):	> 50,000 h
Color reproduction index:	Ra>= 96 (at 3,500 K) R9 = 89 (at 3,500 K)
Max. radiant power at 0.5 m:	105 W/m²

Cap BabyFlow®, disposable, size L, green, 25.5 – 28 cm (10 – 11 in) head circumference, 5 pcs.	8418536	379, 384
Cap BabyFlow®, disposable, size M, red, 23 – 25.5 cm (9.1 – 10 in) head circumference, 5 pcs.	8418535	379, 384
Cap BabyFlow®, disposable, size S, yellow, 20.5 – 23 cm (8.1 – 9.1 in) head circumference, 5 pcs.	8418534	379, 384
Cap BabyFlow®, disposable, size XL, orange, 28 – 30.5 cm (11 – 12 in) head circumference, 5 pcs.	8418537	379, 384
Cap BabyFlow®, disposable, size XS, white, 18 – 20.5 cm (7.1 – 8.1 in) head circumference, 5 pcs.	8418533	379, 384
Cap BabyFlow®, disposable, size XXL, blue, 30.5 – 33 cm (12 – 13 in) head circumference, 5 pcs.	8418538	379, 384
Cap BabyFlow®, disposable, size XXL+, white/black, 33 – 36 cm (13 – 14.2 in) head circumference, 5 pcs.	8418539	379, 384
Cap for water vacuum gauge, for VarioVac® T Rail WV (MP00512), VarioAir® T Rail WV (MP00544) and water vacuum gauge (MP00518), including gaskets, combination possible with filter MK00514 and plug nozzle MP00566	MP00595	318
Cap secretion jar Medela	MP03231	305
Cap, for 700 ml secretion jar, with overflow safeguard	2M85011	299
Cap, for secretion jar, for fistula indicator for continuous and thoracic drainage	2M85013	299
Cap, for secretion jar, w/ overflow safeguard and pressure relief valve (≥ 0.1 kPa)	2M85012	299
Cardiac Output cable, 3 m	2601201	233
Cardiac output kit, Argon/Merit Medical	7265163	204
Cardiac output kit, Baxter	7265155	204
Carrier rack CD	2M85380	295
Carrying rack bronchial suction	2M85381	295
Catheter mount ErgoStar® CM 40, disposable, 10 cm, double swivel elbow, 50 pcs.	MP01840	63
Catheter mount ErgoStar® CM 45, disposable, 15 cm, double swivel elbow, 50 pcs.	MP01845	63
Catheter mount ErgoStar® CM 50, disposable, 10 – 16 cm, extendable, 50 pcs.	MP01850	63
Catheter mount ErgoStar® CM 55, disposable, 15 cm, straight, 50 pcs.	MP01855	63
Catheter mount ErgoStar® CM 60, disposable, 10 cm, small, double swivel elbow, 50 pcs.	MP01860	63
Ceiling holder, rail holder for compact suction systems and secretion jar sets	2M85119	296, 339, 432
Clamp for GCX rail, 5 pcs.	2M60401	348
Cleaning plate for CLIC adapter	MX50081	101
CLIC Absorber 800+, disposable absorber, 1.2 l, 6 pcs.	MX00004	100
CLIC Absorber Free, disposable absorber, 1.2 l, 6 pcs.	MX50100	100
CNAP™ cuff controller and cradle	MS26125	146
CNAP™ cuff controller forearm strap	MS26122	146
CNAP™ intermediate cable for Infinity® CNAP™ SmartPod®, for CNAP™ controller	MS15893	146
CNAP™ sensor cuff, size L	MS15896	147
CNAP™ sensor cuff, size M	MS15895	147
CNAP™ sensor cuff, size S	MS15894	147
CO cable for Infinity® PiCCO Pod	MS16916	161
CO catheter cable	8419160	159, 204
CO catheter cable for Infinity® PiCCO Pod	MS16918	161
CO connection cable, 1 m	3368458	159, 204
CO Control Syringe	2601192	233
CO In-line Injection temperature probe Becton Dickinson	2601190	233
CO In-line Injection temperature probe housing	2601191	233
CO thermistor cable Argon/Merit Medical	8420077	159, 204
CO thermistor cable Baxter/Edwards	8539983	159, 204
CO thermistor cable for Infinity® PiCCO Pod	MS16919	161
CO thermistor T-piece Argon/Merit Medical	5741975	159, 204

CO_2 sampling line, disposable, for Vista 120, 100 pcs.	2607550	234
CO_2 sidestream water trap, for Vista 120, 20 pcs.	2605124	234
CombiStar A Filter HME, combination of airway connector MP01845 and filter TwinStar® 55 Plus (MP05805), 25 pcs.	MP12060	64
CombiStar F-HME HEPA flex, combination of flexible tube extention MP01850 and filter TwinStar® HEPA Plus (MP05801), 25 pcs.	MP12062	64
CombiStar Filter HME flex, combination of flexible tube extention MP01850 and filter TwinStar® 55 Plus (MP05805), 25 pcs.	MP12061	64
CombiStar mechanical Filter flex, combination of flexible tube extention MP01850 and filter SafeStar® 55 Plus (MP05790), 25 pcs.	MP12063	64
Compact flowmeter Clickflow configurator, gives you the option of arranging the compact flowmeter according to your requirements, selectable options for configuration	MP13000	269, 421
Compact rail, for 38 mm tube, standard rail profile 25 × 10 mm, each side 10 cm, weight: 0.9 kg, max. load: 30 kg	2M85337	279, 341, 377, 435
Condensate management hoses for Isolette® 8000 and 8000 plus, disposable, 20 pcs.	MU21120	354, 356
Connection cable, connects HemoMed Pod to monitor, 3 m	5591925	148
Connection cable, connects HemoMed Pod to monitor, 5 m	5591933	148
Connection hose Medela	MP03233	305
Connection hose, silicone, reusable, ID 5 mm, wall thickness 2 mm, by meter	1203606	299, 431
Connector pressure Oxylog® VE300	MP01372	46
Continuous drainage 1, for continuous and wound drainage, precision regulator, fistula indicator and bacterial filter 767 included, capacity 700 ml, maximum capacity up to the overflow safeguard 1,000 ml, scale in steps of 10 ml up to max. 700 ml	2M85151	314
Continuous drainage 3, for continuous, wound, and thoracic drainage, precision regulator, water vacuummeter, fistula indicator and bacterial filter 767 included, capacity 700 ml, maximum capacity up to the overflow safeguard 1,000 ml, scale in steps of 10 ml up to max. 700 ml	2M85153	314
Control panel	MP00589	435, 341
Controller cable for Aerogen Pro	MP01036	93
Corrugated hose, reusable, N/P, 14 cm, connector 10 mm/10 mm, Ø 10 mm	8403333	39, 392
Cover for skin temperature probe CARE-FOR-ME, hydrogel, disposable, large, 100 pcs.	MU06943	347, 349, 351, 353, 355, 357, 360, 363, 366, 369, 373
Cover for skin temperature probe CARE-FOR-ME, hydrogel, disposable, small, 100 pcs.	MU06944	347, 349, 351, 353, 355, 357, 360, 363, 366, 369, 373
Covidien Quick Temp Pod Oral	2600146	251
Covidien Quick Temp Pod Rectal	2600147	251
CS connection hose holder	2M85446	296, 306, 339, 432
CS hoses, several hoses to connect flowmeter with the central supply	8601697	319

	Headgear, disposable, soft rubber, small	MP01561	78, 405
	Heating mattress, 1 pc.	2M60170	347
	HI-Flow Star Kit Aquapor A, heated inspiratory breathing circuit for the H300 humidifier, heated inspiratory hose, humidifier chamber, breathing hose when used with a ventilator, O_2 hose when used with an O_2 blender, bed clip, disposable, 10 pcs.	MP17090	27, 82
	HI-Flow Star Nasal Cannula, disposable, adult L, Flow Range < 60 l/min, 25 pcs.	MP05513	82
	HI-Flow Star Nasal Cannula, disposable, adult M, Flow Range < 60 l/min, 25 pcs.	MP05512	82
	HI-Flow Star Nasal Cannula, disposable, adult S, Flow Range < 60 l/min, 25 pcs.	MP05511	82
	HI-Flow Star System, heated inspiratory breathing circuit, consists of: heated inspiratory hose, humidifier chamber, breathing hose when used with a ventilator, O_2 hose when used with an O_2 blender, bed clip, disposable, 25 pcs.	MP05601	82
	HI-Flow Star Valve Kit w/ Pop-Up Valve and Connector 22 mm, disposable, 15 pcs.	MP05507	27, 82
	Hinged arm 240°, 3 hinges, fixable, ball holder system, length 1,155 mm, max. load 0.3 kg, includes hose clamps: MP00493 (1×), 8409841 (1×)	8409609	342
	Hinged arm Infinity® ACS, for positioning and fixation of breathing hoses, this arm can be fixed into place without a hand movement through a patent registered friction torque-breaking system, length 1,080 mm, max. load 0.5 kg, includes hose clamps: MP00693 (1×), 8417396 (2×)	MP00690	342

INDEX BY PRODUCT NAME

Hinged arm Quickstop 2, with universal ball holder system for optional accessories length 858 mm, max. load 0.4 kg, includes hose clamps: MP00493 (1×), 8404761 (2×), 8409841 (1×)	2M85706	342, 436
Hinged arm Quickstop short, with mounted universal tube holder plate, for various tube dimensions/coaxial hoses, specifically designed for OR tables, length 323 mm, max. load 1 kg	2M86463	342, 436
HME HumidStar® 2 Plus, disposable, 2 ml deadspace, 100 pcs.	MP05845	58, 398
HME HumidStar® 25 Plus, disposable, ~25 ml deadspace, 100 pcs.	MP05735	58
HME HumidStar® 55 Plus, disposable, ~55 ml deadspace, 100 pcs.	MP05730	58
HME HumidStar® Trach Plus, disposable, 6 ml deadspace, 100 pcs.	MP05750	58
Holder for cylinder packet for GCX profile	4118453	348
Holder for F&P humidifier U-shaped, for trolley, with rail clamp	MP01002	29, 390
Holder for hinged hood for Babytherm® 8000 WB, 8004 and 8010, reusable, neonatal, mounts to hand rail	2M21342	358
Holder for Infinity® M300 bedside charger,swiveling 360°	MP00990	219
Holder for MultiMed® 12 Pod	5202747	112
Holder for MultiMed® 5/6, MultiMed® Plus/OR, NeoMed Pods and Tcore®, swiveling 360°	MP00721	112, 141, 193
Holder for MultiMed® 5/6, MultiMed® Plus/OR, and NeoMed Pods	5598128	112
Holder, lateral (F&P 900 MR 309), including 8411074	MP01009	29, 390
Hook ring for LiteStar® anesthesia masks, disposable, 22 mm ID, for sizes 3 – 7, 30 pcs.	MP11008	74
Hook ring for SediStar® anesthesia masks, disposable, 22 mm ID, for sizes 3 – 7, 30 pcs.	MP01708	73
Hook ring for silicone masks, reusable, 15 mm OD, for sizes 00 – 1, 10 pcs.	MP01916	77, 404
Hook ring for silicone masks, reusable, 22 mm ID, for sizes 2 – 5, 10 pcs.	MP01917	77

	VAC CS hose DISS Hand 10L	4199590	330
	VAC CS hose DISS Hand 15L	4199589	330
	VAC CS hose DISS N/DISS N 10L	4199602	330
	VAC CS hose DISS N/DISS N 15L	4199601	330
	VAC CS hose DISS N/DISS N 20L	4199600	330
	Vacuum aspirator DISS Canada, version for Atlan® A300/A350 and Perseus® A500	MP00687	287
	Vacuum aspirator DISS, version for Atlan® A300/A350 and Perseus® A500	MP00686	287
	Vacuum aspirator NIST, version for Atlan® A300/A350 and Perseus® A500	MP00689	287
	Vacuum regulator dual VarioVac® B/OR Rail, for bronchial and OR suction, gas connection NIST VAC	MP00516	285, 304
	Vacuum regulator VarioVac® B AGA, for bronchial suction, gas connection VAC, Swedish standard	MP00504	284
	Vacuum regulator VarioVac® B BS, for bronchial suction, gas connection VAC	MP00502	284

INDEX BY PRODUCT NAME

Vacuum regulator VarioVac® B CARBA, for bronchial suction, gas connection VAC	MP00514	284
Vacuum regulator VarioVac® B compact, for bronchial suction, gas connection NIST VAC, including secretion jar set and integrated vacuum regulator	MP00506	292
Vacuum regulator VarioVac® B DIN, for bronchial suction, gas connection VAC	MP00501	284
Vacuum regulator VarioVac® B NF, for bronchial suction, gas connection VAC	MP00503	284
Vacuum regulator VarioVac® B/OR Rail DISS, for bronchial and OR suction, gas connection DISS VAC	MP00631	285
Vacuum regulator VarioVac® B/OR Rail, for bronchial and OR suction, gas connection NIST VAC	MP00505	285, 304
Vacuum regulator VarioVac® D AGA, for continuous and wound drainage, gas connection VAC	MP00510	308
Vacuum regulator VarioVac® D BS, for continuous and wound drainage, gas connection VAC	MP00508	308
Vacuum regulator VarioVac® D CARBA, for continuous and wound drainage, gas connection VAC	MP00515	308
Vacuum regulator VarioVac® D DIN, for continuous and wound drainage, gas connection VAC	MP00507	308
Vacuum regulator VarioVac® D NF, for continuous and wound drainage, gas connection VAC	MP00509	308
Vacuum regulator VarioVac® D Rail, for continuous and wound drainage, gas connection VAC	MP00511	308, 423
Vacuum regulator VarioVac® MRI B/OR Rail, for bronchial and OR suction, gas connection NIST VAC, for connection to all standard wall rails	MP03222	286
Vacuum regulator VarioVac® MRI P Rail, for bronchial suction, gas connection NIST VAC, for connection to all standard wall rails	MP03223	286, 424
Vacuum regulator VarioVac® P compact, for bronchial suction, gas connection NIST VAC, including secretion jar set and integrated vacuum regulator	MP00661	292, 425
Vacuum regulator VarioVac® P Rail DISS, for bronchial suction, gas connection DISS VAC, for connection to all standard wall rails	MP00632	286
Vacuum regulator VarioVac® P Rail, for bronchial suction, gas connection NIST VAC, for connection to all standard wall rails	MP00660	286, 424
Vacuum regulator VarioVac® T DIN, for thoracic drainage, gas connection VAC, for connecting to the central vacuum supply	MP00664	309
Vacuum regulator VarioVac® T Rail WV, for thoracic drainage, gas connection VAC, water vacuum gauge included, for connection to all standard wall rails, double-scaled immersion pipe (kPa and cmH2O)	MP00512	310, 315
Vacuum regulator VarioVac® T Rail,for thoracic drainage, gas connection VAC, for connection to all standard wall rails	MP00663	309
Vacuum suction DISS Canada, for bronchial suction, gas connection VAC	MK03320	287
Vacuum suction DISS, for bronchial suction, gas connection VAC	MK03140	287
Vacuum suction NIST, for bronchial suction, gas connection VAC	MK01422	287
Ventilation hose holder, reusable, 40 cm	8411075	348, 352
Ventilation valve for Oxylog® 1000, reusable	2M86800	45
Ventilation valve for Oxylog® 2000/3000, reusable	8412001	46
VentStar Autobreath N for Resuscitaire® and TN300, N, disposable, 25 pcs.	MU10841	350, 361
VentStar® Aquapor dual heated, Adult and Paediatric, 10 pcs.	MP07130	27
VentStar® Aquapor, dual heated, N plus, 10 pcs.	MP07150	27, 388
VentStar® Aquapor, heated, Adult and Paediatric, 10 pcs.	MP07131	27
VentStar® Aquapor, heated, N plus, 10 pcs.	MP07151	27, 388
VentStar® Breathing Bag 0.5 L, 25 pcs.	MP02710	15, 386
VentStar® Breathing Bag 1 L, 25 pcs.	MP02711	15
VentStar® Breathing Bag 2 L, 25 pcs.	MP02712	15
VentStar® Breathing Bag 3 L, 25 pcs.	MP02713	15

INDEX BY PRODUCT NAME

	VentStar® Helix, dual heated, 10 pcs.	MP02606	24
	VentStar® Helix, heated, 10 pcs.	MP02607	24
	VentStar® Resus Neo with pressure measurement line, disposable, N, 1 m, 25 pcs., not made with natural rubber latex	MP00311	350, 361, 386
	VentStar® Resus Neo, disposable, N, 1 m, 25 pcs., not made with natural rubber latex	MP00310	350, 361, 386
	Vista 120 printing paper, 4 rolls	2606231	237
	Vista 120 rechargeable Lithium-Ion battery	2606229	237
W	Wall holder, with fixing screws, for compact suction unit and secretion jar set	M26859	296, 432
	Warming mattress TransWarmer®, disposable, self warming for approx. 2 h, 6 pcs.	MP01414	373
	Water bag holder 900 MR 290	MP01008	29, 390
	Water container with screw thread + gaskets, for VarioVac® T Rail WV (MP00512), VarioAir® T Rail WV (MP00544) and water vacuum gauge (MP00518)	MP00565	318
	Water container, for continuous drainage system 2 – 4, w/o screw thread	M20668	317
	Water tank and water transfer hose, for Caleo®, reusable	2M50040	352
	Water trap for Evita® 2 dura, Evita® 4, Evita® XL,reusable	8413125	85
	Water trap Infinity® ID WaterLock® 2, 12 pcs.	6872020	25, 172
	Water trap with outlet, reusable N/P	8404760	39, 392
	Water trap, reusable, A	8404985	40, 43, 51
	Water trap, reusable, N/P	8409627	39, 51, 392
	Water vacuum gauge, for thoracic drainage, combination w/ VarioVac® D and VarioAir® D,for connection to all standard wall rails, double-scaled immersion pipe (kPa and cmH2O)	MP00518	315
	Watertrap WaterLock® 2, 12 pcs.	6872130	25, 172
Y	Y-cable CO_2 and analog/sync	MS22259	168, 205
	Y-cable, reusable, 7-pin connector, for 2 temperature probes	5592154	139, 191
	Y-piece 90° with Luer Lock, reusable, A	M33278	42, 43, 50
	Y-piece for F&P, reusable, A	8412888	50
	Y-piece straight, reusable, N/P	M27077	50, 396
	Y-piece with sensor mount, reusable, A	8405435	40, 50
	Y-piece, polyamide, reusable, straight, A	M25650	41, 50
	Y-piece, reusable, N, 90°, with suction opening	8403075	39, 44, 50, 392, 393, 396

Not all products, features, or services are for sale in all countries.
